AMENDMENT

In The Claims:

Claim 1 (original) A method suitable for an electronic system for restoring a backup data, comprising:

providing a backup data file comprising at least an application data; and

searching an application program corresponding to the application data within a registry of the electronic system,

if it is found that there is an application program corresponding to the application data, the application data is restored;

if it is found that there is no application program corresponding to the application data, the application data is not restored.

Claim 2 (original) The method for restoring the backup data of claim 1, wherein the backup data file further comprises a Personal Information Manager (PIM) data, and the method for restoring the backup data further comprises:

reading and restoring the Personal Information Manager (PIM) data to the electronic system.

Claim 3 (original) The method for restoring the backup data of claim 2, wherein the backup data file further comprises an original model data, and the method for restoring the backup data further comprises:

reading an current model data of the electronic system; and

comparing the current model data with the original model data, and if they are matched, all backup data in the backup data file are restored.

2

Claim 4 (original) The method for restoring the backup data of claim 1, wherein the electronic system is a mobile device.

Claim 5 (original) The method for restoring the backup data of claim 4, wherein the mobile device is a Personal Digital Assistant (PDA).

Claim 6 (original) The method for restoring the backup data of claim 5, wherein the PDA is a Pocket PC.

Claim 7 (original) The method for restoring the backup data of claim 4, wherein the mobile device is a Smart Phone.

Claim 8-15 (canceled)
